SMART METER UPDATE Manual Meter Reads are a Thing of the Past!

Since 1992, the District has contracted with Alexander's Contract Services of Atascadero, California for reading the District meters on a monthly basis.

With the implementation of Smart Meters, this service will be discontinued. Rather than monthly meter reads conducted over three days, water usage data is now available daily through the Watersmart Program, providing for earlier leak detection and creating far more opportunities for efficient water use. Montecito Water District extends a hearty thank you to Alexander's for their years of dedicated partnership.
